To whom it may concern

Re: Proposed building houses on Horsforth Greenbelt A65

I am emailing to express my feelings as a Horsforth resident to totally object to the proposed building of 1000 new houses on the A65 and the strawberry fields in Horsforth. Horsforth has already recently seen a large number of new housing developments and there is no room for any more. You are proposing to build on greenfield sites which is unacceptable.

Horsforth is already seriously overcrowded, the traffic around Horsforth roundabout is already horrendous and the building of these houses will only make it worse. More worrying for me is the serious lack of Schools in Horsforth which already cannot cope with the number of children. Adding these houses is only going to make the situation even worse unless you are proposing to build new Schools including a high school? There will also be a big environmental impact and the current infrastructure of Horsforth just cannot cope.

I hope that you will reconsider building these new houses in Horsforth and again want to state as a local resident my total objection to the plans.

Please can you keep me updated with the outcome of the consultation.

Thanks

Estelle Campbell
