Tell us your story:

City council asking the community for there thoughts and if they agree with possible housing sites in pudsey. I am only 15 years old but I take geography for GCSE and I care very much for land around us. Now under currently law it states that fundamental aim of green belt protection is to urban sprawl taking over that land and also says that with green belt protection its to try and keep the look of the town and to keep its history. I hugely disagree with you building on the land next to where I live as they are woods they that are peaceful and provide for the community as a good place to walk your dog. Those woods also belong to the animals such as birds, owls, bats, deer and many more. So if you decided to build on that land you will destroy their homes. I also don't houses there because as my parents and neighbours have said they moved to pudsey because of the greener and having the green belt there. Aslo where you plan to site 2120 that area is prone to flooding pr!

one to flooding when it heavy rains. I also disagree with the site proposal of 1073A, 3440 and 1073b as I have neighbours who live on that back wall and they said they will have to move house of houses are built there because those trees that are they now provide privacy and they said they don't want to be overlooked by houses.

What outcome do you want to happen?

For the council not to build houes there and leave the green belt alone and leave pudsey alone we don't need more houses at the expense of destroying the green belt.

What do you want us to do?

Take action and let me know what you have done
