We would like stress our concerns for the above proposal of building 414 new houses in Rawdon and 2050 more houses in Horsforth.

The proposals are not legally compliant. Green Belt MEANS Green Belt we bought our house on the strength of the those words. The planning has not been positively prepared. LCC has not taken into account Doctors surgeries, schools (there is only one school to be built on the proposed site) transport: buses are full at peak times on the A65 and the traffic on the A65 itself makes the journey very long going to and from work adding up to 2 hours on a daily basis. The new traffic lights at Horsforth Roundabout will not ease this extra congestion.

We are strong believers in keeping as many areas as possible green and keep the environment and habitat as close to nature as possible. To build so many houses in these areas are sacrilegious. There are thousands of houses in Leeds at this very moment which are empty which could be restored.
