To whom it may concern,

Thank you for your email on 18.09.2015. With respect to the following part of the email below
....

Tests of Soundness

We are only asking for views about the 'soundness' of the Plans, relating to have they been positively prepared ?, Are they justified ?, Will they be Effective ?, Are they consistent with the National Planning Policy Framework ? An independent Inspector will examine these Plans against these tests. More information on the tests of soundness can be found in the Planning Inspectorate's guidance document 'Local Development Frameworks: Examining Development Plan Documents – Soundness Guidance'. This is available from www.planning-inspectorate.gov.uk and also available as a link on our LDF web page.

I would like to check the "soundness" of the traffic survey being conducted during the half-term holiday period. This is surely not representative of the actual traffic conditions that residents face on a daily basis?! The A65 is one of the busiest and vital arterial routes from Leeds and everybody knows how busy it is – especially during peak hours. It is almost unusable on certain weekends when people want to go to the dales. This is perhaps the single most important consideration when looking towards building any new houses in this area of Yeadon – the present roads already can't cope. As a resident I face significant delays and traffic congestion on a daily basis and nearly all of my delays revolve around the already choked A65.

I sincerely hope that a fully independent traffic survey and analysis will be conducted or we can only assume that there is no "soundness" to any of the proposals.
