I am commenting on site proposals 2160, 3331,3329 and 4095.

I know we need more housing for people but the road can't take any more cars. I cannot get into my doctors now very easily and we have to wait to see our dentist and he is expensive.

I work with the horses near the roundabout and we would not be able to have those there with Harry and not be able to ride anywhere.

All the fields are going and that means there will be less wildlife which I think is bad.

You only seem to build big houses not the ones people want and my school can't take anymore people.

Please don't build houses here without doing other things first- I don't know what they are but think you need to do something.

Thank you
