I live on Rawdon road and have lived with the upheaval of the Rodley roadworks and the Horsforth roundabout ! I do not dispute what Redrow have achieved in the houses built on Sandoas site good job but how can building more houses with more cars on surrounding sites be feasible !! The roundabout at horsforth takes 35 minutes to get to from Rawdon timed over its opening ! The surrounding areas are a place of natural beauty cutting off urban development and allowing residents of surrounding areas chance to appreciate local Roman / Iron Age history in country walks. I believe Horsforth is the largest registered village ! So another hundred or so houses on an already stretched infrastructure ! Why

Regards
