---

Hi I am a resident of Rawdon and I am writing to you about my disgust of the thought of plans proposed by the council to build on green belt land in Rawdon and the surrounding areas. I am mainly concerned about the plans to build on the HG2-12, HG3-2, HG2-41 and HG2-43 for obvious reason as I live near by.

This proposal shouldn't have been entertained as building on green belt sites are not consistent with the national policy and the proposal to use a greenfield site before brownfield is not justified and should never happen.

The proposal to use this strategic green infrastructure goes against the Leeds Core Strategy.

I moved to the area 5 years ago because I wanted the semi rural feel and life style that comes with it. I love the outdoors and walking the dog around the area with my family and I feel a lot more healthier since I moved into the area. Also I don't think the area could handle any more homes as the road network, mainly the a65 is already really congested and the thought of more traffic isn't worth thinking about. And if the a65 got any busier it would push more traffic onto the back streets making it unsafe for all the families who live their....it would only be a matter of time before a fatal accident would happen.

Many thanks for listening to me and I hope this might make a difference.
