Subject: PDE00563_Objection to green belt building, Rawdon
Date: 09 November 2015 09:14:08

I feel this development is NOT justified for the following reasons
A65 is over-capacities already, long queues every day to reach the Horsforth roundabout even with the recent traffics light constructed.

Vital areas of green belt lost forever.

Over the last 5 years we have had hundreds of houses built on our green belt all of which makes the schools, roads, doctors surgeries over subscribed causing massive congestion in all these vital services.

Please think carefully before you decide on these building plans and try to consider how frustrating and difficult it is for the people already living in this area trying to go about our ordinary lives, I have to make weekly visits to St James hospital and it can now take me up to 40 mins just to get to the Horsforth roundabout from where I live, this is through out the day not just rush hour which is now all day long.

I ask you to re-consider these building plans.

Yours sincerely,

John and Ann Glynn
