Subject: PDE00588_Fwd: Proposed building on green belt ..site ref HGX_XX
Date: 08 November 2015 16:51:10

Hi from Helen, Jeremy and Noah, with respect.....this is my 2nd attempt to beg for reconsideration regarding the building of many new houses on our precious and beautiful green belt, so designated for the flora and fauna it sustains. This area is for everyone, including you, and its importance cannot be underestimated, please build on brown sites first, there are so many in the Leeds area, and develop the wasted and failing empty buildings in and around the city. Don't you appreciate our brilliant countryside? Can't you see the destruction and sorrow caused by the need to obliterate our heritage? I hope you do and I hope you can. Thanks for reading this..if you did! Love Helen x

Subject: Proposed building on green belt

Dear Mr. Wakefield, I am writing to ask for your consideration of the proposed building on green belt and our wonderful, special and so far protected area of Cragg wood, specifically the Knott Lane end of Woodlands Drive in Rawdon. It seems that a plan to build 200 houses on this site has been put forward, we are passionate about our environment, but it is better if, instead of waxing lyrical about our homes, I list the reasons why this would be, with respect, such a bad decision.

we have worked very hard, and for a long time, to be able to be lucky enough to live in this area and the building would destroy that. If that seems selfish I would challenge anyone to not see the beauty in this green space.

2: the main reason for not only living here but walking these woods and fields, is the abundant wildlife that we share this space with.

3: many people from outside the area enjoy our countryside and for families to walk together, enabling children to learn about the environment and gain respect is really important for all of our futures.

You will be aware of the effect of availability of nature and wildlife, bird song and flowers in the promotion of good health, both physical and mental, I believe that because of the number of people who walk here this would have a profound effect.

5: the trees are being decimated around our countryside ..we need them for so many reasons..again physically and for our air quality.

6: I will make an assumption that you understand the devastation on our wild life. We have deer, badger, foxes, horses and so many bird species, indeed many twitchers visit this area .

7: this is not a request for the nimby in us all, this a heart felt plea to do the right thing..England's green and pleasant land must be at least fought for .all too soon we will be one more urban sprawl. we have no way of facilitating more healthcare at this time schools are full and traffic as you know is constantly at a standstill in this area. I implore you to reconsider please think of the animals. Thankyou for reading my note. with love Helen Sayes resident in the cragg wood area.
