HG2/143/144/145. Before looking at more house building in Drighlington I think you should be looking at the problems we already have with the housing situation now 1. schools not able to cope with numbers of child. 2. doctors not able to cope, for a booked appointment with a named doctor you are looking at a 10 days wait not acceptable. 3. road traffic we had a by pass built but this is now. At most parts of the day having queuing traffic as is king street and Whitehall road mostly with heavy lorries and family cars Drighlington at the moment is struggling to cope with population increase and to further increase the housing numbers will only add to the problem .
