Good day,

I am responding to the Leeds Site Allocation Plans. The sites I'm objecting to are HG2-41 (4240), HG2-42 (1016), HG2 -43 (5009) and HG2-12 (4254).

My main reason for objecting to building on any of these sites is that Horsforth and the surrounding area cannot cope with anymore road traffic. Horsforth station is already over utilised and there is no-where to park, which is now causing serious congestion on all the surrounding streets and roads. Secondly, one of the main attractions of Horsforth and Rawdon is the easy access to fields and bridle paths which would be lost if any more housing estates were built.

There is also a shortage of schools, which again would be made worse by an influx of residents.

Hope you appreciate my contribution,

Marc Springer
