To whom it may concern,

I am writing to express my concern over LCC's plans to allow the building of 2300 houses in the Airborough area and 2050 houses in the Horsforth area of Leeds. As a resident of this area I fail to see how the roads surrounding the proposed sites are going to cope with the extra traffic that building these houses will undoubtedly bring with them, the A65 is already jam packed most days. The schools around this area are already oversubscribed and further housing would put far more strain on them so this is another major worry of mine.

And furthermore, many existing residents have moved here to take advantage of the lovely green spaces and views which I feel will be obliterated by the proposed work.

Please take this as a formal objection from a local resident.

Mr David Tiffany
