---

I object to plans 2163,1180,1311 & 1113

Guiseley has had more than its fair share of new house building, I understand MORE than anywhere else in Leeds district recently.

I am sure there are plenty of inner city areas that could be built on before building on green field sites.

But the problem is as you well know that the builders want to build in areas where they can sell their

big houses for more money, it would be more palatable if these sites that are planned in Guiseley were

going to be full of houses for first time buyers and for people who wish to downsize, but the builders won't want to do this as they won't make as much profit.

Is the Leeds Council after a pat on its back from the government when councils like Harrogate take no

notice of government demands?

Before houses are built infrastructure should be put in place, i.e. new roads doctors dentists new trains etc.

with help from the builders, otherwise all this comes out of my rates.

So all you are doing is making builders rich and antagonising the rate payers.
