Reference Church Lane Paddock Allocation HG2 – 50

Peter Melling
16 Church Lane
Leeds LS6 4NP

I object to the allocation of the above for building and question the soundness of the plan for the following reasons -

Traffic safety

Pressure on local services

Drainage issues

I also question the need for housing on this site as Meanwood is already contributing more than its allocation requirements via the other allocations including the planned 54 flats on the Working Mens Club site.

Church Lane Paddock is the only green space left within the urban community of Meanwood and not only does it provide natural wildlife habitat and a proper foreground for the Grade 2 listed church but it is also a green space where the local people may find time as they pass by to enjoy some peace and calm, medically proven to be of invaluable psychological benefit.
