Green Belt is Green Belt.

Site HG2 41 is a green belt site. To remove this from the green belt is against the National Planning Policy Framework.

HG2 43 is a green belt site. To remove this from the green belt is against the National Planning Policy Framework.

The proposal to use green infrastructure is in contradiction of the Leeds Core Strategy.

The prospect of building on both these sites, and **the others listed**, has not taken into consideration the **volume of traffic on the A65**. Despite the introduction of traffic lights on the Horsforth Roundabout - it has made some improvement to the flow of traffic on the actual roundabout - the roads leading onto it remain congested, especially at the peak periods when commuter traffic is huge with long tailbacks. Imagine the additional cars coming out of these proposed sites.

Our environment is being eaten away field by field. We need green spaces in cities, it's good for our health and wellbeing , it's good for the atmosphere, and our flora and fauna is threatened.

Please stop this happening. Reconsider.
