To whom it may concern,

I am writing to you in complete objection to the proposed housing Site HG2-10 (1221) Gill Lane for many reasons including;

Thought the land was 'green land' how has that changed in just over a year from when I did my research into buying it the area?

The traffic in the area is already at a incredibly high level.

Where will the access points to the new estate be situated?

The schooling in the area will have increased pressure put on it and I have concern on how this will affect the education my children will receive.

The field currently has live stock grazing on it what will happen to them also what will happen to the beck at the bottom?

The field is on a large decline (hill) and I want to know how building will affect the structure and foundations of the houses at the top, mine being one of them.

How will the new estate affect the housing property prices in the area.

There are 4 people living in my house who all strongly object and would like some answers to justify why the housing estate would be beneficial to everyone not just those who will profit from them. There are many areas in Leeds that already have the housing available where the money can be spent to improve.

I await a response from you,

Yours sincerely
