---

Dear Sir/ Madam,

As part of the Leeds Site Allocation Plan public consultation process, I would like to formally object to the proposed development of 3 sites - HG2-41(4240), HG2-43(5009) and HG2-432(1016).

Please can I check as I believe that the proposed development sites are not consistent with the national policy, specifically with regard to Green Belt. I was under the impression that Leeds has a duty to continue to protect our Greenbelts and green fields. I am also under the the impression that there are a number of brown field sites available within Leeds.

The fields and open green spaces are really important to me and I walk the are on a regular basis and visit the strawberry fields and buy the asparagus from the local sources. We use the area for walking and cycling. The wildlife habitats in this areas is quite delicately balanced.

Is the proposed development consistent with the national policy ,specifically with regard to infrastructure. Leeds has insufficient policies in place to address the issues that these developments will generate. Development and infrastructure requirements must be considered side by side.

Development of these sites on greenflies will lead to nearby villages being engulfed within the 'Main Urban Area' and they will no longer be separate 'Major Settlements' of their own. reference , Adopted Core Strategy ( Map 3 Settlement Hierarchy).

I am concerned over the lack of appropriate infrastructure and especially the increase in traffic. The A65 roundabout is already a very difficult junction. How will the bridges over the river, canal and railway continue to support the ever increasing levels of traffic.

Please keep me informed of the public examinations, submissions of the plans and potential outcome of the review as I would like to retain my right to attend and speak.

Yours faithfully

Hilary Woodall
