Sir/ Madame,

With respect to site codes HG2-41, HG2-43, HG2-12, HG3-2, HG3-3 and HG3-4 I would like to raise a most sincere objection to the proposed greenbelt development. Why is it that greenbelt land is being used in this manner, especially when you consider the sufficient amount of brownfield sites available locally.

It is not right to develop these sites (in direct contravention to your own core strategy and the national policy (NPPF)). This will also harm nature and increase urban sprawl.

If this goes ahead I will be carefully scrutinising to see which one of you corrupt fools is taking the kickback, because there is no logical reason for this proposal to be approved.
