I would like to object to Leeds City Council's plans to desecrate our greenbelt. This should be protected for future generations and not destroyed for short-sighted wins. Whilst I appreciate houses are needed, these should not be built on greenbelt.

The greenbelt was initially identified to protect England and what is important to those that live here. This is not just about people but habitats as well. This is not sustainable at all. We need to think differently at developments, build on brownbelt and build higher to accommodate rather than continually poaching the countryside.

I also think that these plans have not been advertised enough - with little to no consultation. I have heard of these via objections on Facebook. This is disgraceful.

My objections relate to :-

site HG1-58 (1191a). I have already objected in full to this on numerous occasions.

site HG1 - 31 (4000).

site HG1 -29 (1199b). I have already objected in full to this on numerous occasions.

Thank you, Sally Leng
