---

We are not at all happy and object with the proposed plans for building in Rawdon and Horsforth areas. It is our suspicion to us that Leeds Council have made a 'deal with the devil' in respect to the new Airport link road and allowing developers to cherry pick Greenbelt land. These developments would change the character of the area entirely and would start of a process of getting the road paid for at expense of Greenfield sites.

We have been made aware that the site allocations plan is unsound because the Council has not carried out a genuinely comprehensive Green Belt review. HG2-12 and HG3-4 are in particular the worst offenders and would have a massive impact of the visual aspect of the area and is land my family and I walk in.

There is an A65 that is full to capacity and these plans would forever blur the lines with Bradford and Leeds and the character of Rawdon as a village. Agricultural and Greenbelt land needs to be protected and I believe there are plenty of Brownfield sites that should be developed that are currently not in use after all the years of recession. What we have read does not support the notion that these have been properly researched.
