**Subject:** PDE01398\_HG2-12 objection on the grounds of effectively.  
**Date:** 15 November 2015 15:06:55

---

I am writing to object to the plans to build 130 new houses at the HG2- 12 site  
We are residents of Woodlands drive, off Knott lane and have very realistic knowledge of the already difficult daily traffic situation along the A65.  
Without the further housing, this road and the ring road at Horsforth roundabout is already beyond saturation point, with it being normal for traffic to be queuing from as far back as the Rawdon crossroads.  
The addition of further vehicles as a consequence of the houses planned would make this area both dangerous and impossible to conduct any peak hour transport, whether it be by public transport or car.  
This area is already beyond saturation point and had any even basic level of research been undertaken into the traffic conditions in this area, then additional housing would never have been considered.

Thank you for taking the time to read this.
