---

I am objecting to the allocation of the following sites for development

HG2-41, HG2-43, HG2-42, HG2-12

I strongly disagree with using Green Belt land for any other purpose than its original intent.

Horsforth is already saturated with housing and the infrastructure can barely cope now.

As a keen follower of wildlife I find it utterly out of order to destroy any more habitats.

Horsforth has steadily become an urban attachment to Leeds and the nice village I came to live in has been ruined over the last 45 years I have lived here by constant redevelopment.

I do not believe any of this housing will be for those who cannot afford to buy a house and are just for the profit of developers.

Why is the council not directing its efforts into making the many empty houses in the city habitable for those who are not well off.

I strongly recommend that the council seriously reconsider its plans for these areas.

Yours sincerely
