Dear sir

I'm writing because I am very concerned about the buildings that may be built in this lovely area, I believe that it will greatly disrupt all of the beautiful wildlife.

If you took the time to walk around, you would appreciate how pretty this place is with all of the cows, sheep, squirrels, birds, deer, foxes and badgers. If you were to build these houses, all of this would disappear, not to mention the trees as well. This is one of the only green spaces in this built up area and is very unique.

So many people love this area just as much as I do and that is why they too enjoy the picturesque walks and outdoor activities like horse riding and cycling. It is so safe for children and families to walk and cycle about.

Building these houses would be a huge mistake and if you just visited you would realise that you can't recreate such a wonderful place like this.

Thank you for taking the time to read this and I sincerely hope that you do not end up building and ruining what we all call home
