Date: 15 November 2015 12:02:34

Dear sirs,

I write to you today with regard to the proposed building allocations for sites HG2-41, 43, 12 and sites HG3-2,3 and 4.

Im very unhappy that these sites are being put forward for building purposes. This is GREENBELT LAND and should be treasured and preserved not only for now, but for our future generations as well.

I use all these areas regularly for family walks, running and general enjoyment and myself and my whole family would be devastated to see them go. We regularly see deer, badgers and have even seen a mole on the HG2-41 area with loads of other wildlife also. It would be a crime to see these beautiful animals left with out homes. I feel it is part of the well being in my life to be able to enjoy these areas with my family and cant envisage loosing the freedom in the surrounding areas to do this.

There are many other brownfield areas in Leeds which could be used before these proposed greenbelt areas and i feel this is just the usual money making, backhanded wheeling and dealing that is becoming so familiar in this day and age. Please listen to your public and keep these proposed new developments at bay. Leeds is a beautiful city, but this is largely due to the amazing green areas and woodland with in it. To alter it so drastically for short term development and money would be a disaster and goes against the Leeds Core Strategy.

We only live once...lets make it a nice, healthy and beautiful environment to live in!

Regards
