### **HG-12 (4254) - allocated for building 130 houses**

I am writing to object very strongly to the proposal to build on this land. I go nature rambling in the area and have often seen foxes, owls, and deer exactly where you are wanting to build. I have also seen lots of butterflies, frogs, and newts in and around the site and it would be an awful shame to lose all this wildlife due to building noise, traffic and houses.

You want to build on what is Greenbelt and I was brought up to believe that my grandfather's generation created Greenbelts to protect the countryside for future generations to enjoy and to continue protecting. From listening to politicians they also believe in the same thing but you want to ignore them. Woodlands Drive and Cragg Wood is a wonderful place right between Leeds and Bradford but nature is struggling to hold on as the valley gets more and more built up.

I hope you will change your minds and not build here and ruin this bit of natural habitat.

Benjamin Clough
