Dear LCC

I am writing to you about Leeds' plan for houses. I live on Coach road and have done all my life and I wanted to give you my opinion on the housing plan for site HG2-5.

First of all there is almost no access to the fields due to the fact that the one road that does go past them (Coach Road) is a one lane road. If houses were built on the fields no one would be able to get anywhere without causing a hold up of some sort. It would be almost impossible to avoid this unless you plan on bulldozing some walls and houses down to create a new road, which in my opinion would be extremely stupid.

I attend Guiseley High School and the quickest route to get to school is to go down Coach road. If houses were built then this road would be dangerous for all the pupils walking down it because of the amount of traffic. Also I don't think that Guiseley High School or any secondary schools in the area have enough room to take in any more students than they already have. Another reason I think that it would be appalling to build houses on this site is that you would be destroying lots of wildlife that thrive on these fields such as; bats, owls, mice, foxes and even deer. You would have caused mass destruction to the natural environment. And also did you know about a thing called global warming? Building all these houses (and im not just talking about Coach Road now) would cause loads of pollution which could cause the ice caps to melt and us all to be submerged in water. So please don't build on these fields because I don't want to live on a boat.

Yours sincerely
