Dear sirs

I am very concerned with the Councils proposal to include Green Belt land in the Local Plan which is not consistent with National Policy
You should be looking at all of the brownfield site in Leeds not Green belt land
The proposal to use the Horsforth and Rawdon Strategic Green Infrastructure goes against the Leeds Core Strategy

I am extremely concerned about the following sites:-
HG2-12
HG3-2,3 &4
HG2-41
HG2-43

These are important green spaces in the area and make Horsforth and Rawdon and surrounding areas stand out from other suburbs. With these proposals it will become just like any other area and it should be something Leeds is proud of as it is on the route out of Leeds into the Dales and beyond

These areas are for families to use as exercise and recreational areas

The infrastructure here cannot sustain any more houses

Build on brownfield sites which are plentiful if these run out create more by demolishing old redundant buildings alongside the river , canal side and industrial areas of Leeds

Yours faithfully
