I am writing to reject the proposals for building on the Gill lane fields. Rawdon is already busy enough with the schools being full and only one doctors surgery. The A65 has a traffic jam on it every day, commuting to schools, shops and work is incredibly slow. I am also concerned about the environment and wildlife on building on areas like this. We should be protecting our greenfield sites not building on them. You will get people leaving the area as it will become a dull built up area that has no appeal for people to live there. Can you not build out from the city and leave the suburbs alone. The travel networks are far better near the city so they can cope with the new houses.

I hope you see sense and cancel these planned houses for all the Rawdon area and protect our villages and green spaces.
