Hello

I am sending this email as a resident close to the proposed site on Gill Lane. I object such site should be considered due to the fact the location would cause more stress and road congestion. The stretch on New Road from Guiseley town centre to Rawdon round about at peak times can be at a standstill and I know that travelling at those times Mon-Fri like most commuters travelling too and from Leeds. Schools within the surrounding location are somewhat at full capacity so that itself would cause a problem from infant to senior level with new families moving in the area. You also need to take on board the environment and green belt land the council used to reject developers buying. I think you need to consider the major impact on what such project will cause. We have issues starting from apperly Bridge with the new train station that is starting to cause traffic jams from Rawdon Round-about down to Woodhouse school so times that by 10 if this housing estate is passed and we then have total melt down. What for, just for a few more houses. Yeadon and Guiseley don't need anymore. Well not in the location your considering.

Regards
Darren Mawson
