---

I feel that we have not been consulted on the below proposals and not legal as proper consultation has not been undertaken- Is the plan consistent with national policy?

Re: HG2-41 Land North of Calverley Lane to A65 Objection to 777 houses will cause too much traffic, problems with parking and also overcrowding of the roads and removing our greenbelt sites. The ring road is very busy before the above proposed building

HG2-43 Horsforth Park Lane Campus - I object to this site being used for extra housing- if anything a new school should be built for all the new houses that have been built over the last three years - Schools are full to their capacity - This site has been used for education purposes for many years and we feel Horsforth still need this option

HG2-42 Broadway and Calveley Lane I object to further houses been built on this site once again causing extra traffic - shortage of school places

The houses that have been recently built in Horsforth and area surrounding are no way affordable for first home starters so once again people born and live in Horsforth are unable to continue to live there due to high house prices - Therefore I object to all the proposed building of housing
