Dear Sir,

HG2 - 5 (2163a)
1180a(1311a)
HG2 - 6 (1113)

I must object to all the housing you are trying to build in Guiseley. Guiseley is full. The A65 is completely chock a block most of the time, we cannot cope with any more cars. The schools have had to extend to cope with the children we have already making much less playing area which obviously causes more obesity. You can never get in to see a doctor. The train station is causing havoc with all the parking around it making driving buses a nightmare - I don't know where they manage to get drivers from as many a time they cannot get through for parked cars.

Building on Silverdale and Coach Road area is crazy. There is one narrow access road to the whole of the estate with cars parked both sides and a busy junction on to Park Road making it an accident zone waiting to happen. How do fire, police etc. get in in an emergency?

Please see some sense and do not build any more in this area, we have not the infrastructure to cope and we have ground to a halt on the roads. I use public transport all the time as a car is a waste of time around here all you do is sit in traffic.

Yours faithfully

J Wainwright
