---

Dear Sir/ Madam,

I have been trying to lodge my submission on the SAP plans for Westwood. However, it has been impossible to manipulate the interactive map. It is slow to respond, and I am unclear how to access the information I need to follow through my submission. I understand that you have extended the deadline for submissions but right now it cannot be considered as fit for purpose.

Earlier today I was successful in making a submission for other sites and fortunately have the skills needed to upload documents and can understand the language...but it is quite a demanding process.

On both counts this is not good enough.

The department has not facilitated democratic process in that, owing to a poor website, I cannot make my views known, nor has it, in my view, facilitated full consultation from all interested or effected parties.

Yours

Gill Dickers
