Leeds Site Allocations Plan HG2-5 (sites 2163a / 1180a /1311a)

I think the plan is NOT SOUND because you have to cut down green belt henceforth killing animals habitats, reducing the amount of photosynthesis which reduces the amount of oxygen being produced into the atmosphere and it doesn't take a fool to work out thats bad!

The other thing that i am really against is a school being built it would be dangerous for people walking to Guiseley school, and that means more Co2 in the air.

But that also means that more students move up to Guiseley school every year and its already cramped to say my school was built for 900 students and 1,300 students already attend.

The greenhouse gases are rising and by cutting down green belt means you are murderers contributing to the death of the polar bears, penguins and snow leopards and then the houses won't mean anything because they will be under water.

SO JUST CONSIDER WHAT I SAID

Thank You
