I am particularly concerned about the possibility of building on the Green Belt. The separation between Horsfoth and Aireborough will be lost making a huge conurbation, an area which contributes to the wellbeing of the population will be lost and it will be impossible to recover that green belt. It will have enormous implications for wild life, for walkers and cyclists; the Leeds Country Way will become a suburban path.

To build on Green Belt I think is wrong, to build on all these proposed areas would be a tragedy.

Yours faithfully
