To whom it may concern,

I object to soundness of your plans for housing on the above sites for the following reasons:

The plans are not justified as a vital areas of greenbelt will be lost forever.

No comprehensive green belt review has taken place under the core strategy

Wildlife habitats will be lost

The A65 is already incredibly busy and the new roundabout at Horsforth has increased the morning queue which will only get worse with even more cars trying to get onto this already overcrowded road and off it mornings and evenings.

I do not believe the developments are in accordance with the NPPF especially chpt 9 protecting green belt, chpt 11 conserving natural environment.

I do not think the development is effective with all the traffic coming up Knott lane . This is currently an issue when there is a service at the crematorium and will only get worse with the proposed houses.

There are also not enou school places for all the new properties in the local primary and secondary schools.

Yours faithfully

Michael Carroll
