To whom it may concern

I wish to make an objection to the proposed use of green belt land in Horsforth & Rawdon, as I strongly believe brown field sites should be considered first. I feel the the infrastructure and road development is not in place for this and I also feel the community has not been adequately notified. Wildlife needs to be protected as well as the needs of the resident community. Developers need to consider brown field sites first and foremost.

Please keep me updated on this matter.
