---

This piece of land should not even be considered for development as it is existing greenbelt which will have a cycle path enabling many people to enjoy the countryside between burley in wharfedale and pool in wharfedale. There are already enough empty houses and brown field sites in Leeds to meet future plans. The development in Otley is going to cause major congestion on the roads in Pool as most traffic will come this way rather than getting stuck in Otley. The main street in Pool cannot be widened and already traffic comes to a halt if two articulated vehicles come in opposite directions or one mounts the narrow pavement endangering the villagers. Most of the proposed developments are going to cause major congestion on already congested roads. Surely consideration should be given to widening the proposed developments to new sites not already overpopulated as was undertaken at Milton Keynes
