Hi, just to be clear, the geographic coverage for the community facility is, I understand, the building marked "club", and the areas shaded red, green and blue on the map. This would need to be checked with the organisation that awarded community facility status.

The areas which are beautiful green areas are the areas marked in red and blue on the map, extending to the woods adjacent to the blue shaded area.

Hi there,

Please can I request that the areas in this map, and the house to the North, are recognised as a community facility? There has been a formal community facility application which has been successful.

Please can the garden and green area in red and blue be accepted as a beautiful green space, and zoned as such. About £10,000 of Council money went into restoring the garden.

I would object if the abover were not the case.

Thank you,

David Mackie

Hi there,

Can I please request that all such successful community facility applications in Leeds are designated as community facilities or potential community facilities in the Council's spacial allocations? This may need a new zone type.

I would object if this were not the case.

Thank you very much for your help and kind regards,

David Mackie
