Dear Sir,

We wish to object to the development to the fields at the end of the Col-de Sac on Banksfield Mount, as this was never planned as a through road.

There has been no consultation or letters to the residents at all.

Are the Council trying to slip through planning and keep the residents in the dark? Without planning consultation, for such a large development we do feel we have a right to have a public enquiry.

When we purchased 'Banksfield Mount' for our retirement, we made enquiries about these fields mentioned, we were told they would never be built on, because they were on the flight path to Leeds/Bradford airport.

The roads and sewers were not built to take such a large increase of housing. As this has just been made a 20mph zone, children ride their bikes on the road in safety, a large increase of construction traffic would be an accident waiting to happen.

There are plenty of brown field sights, without building on green field sights.

We strongly put our objection to cabinet. Yours faithfully
