Green Belt Development

To whom it may concern,

We are Horsforth residents and have been for twenty years. We object most strongly to your proposed development plans on Green Belt sites on the A65 and within the Horsforth area.

We note that in your previous planning document Site HQ 2-41 was shown as "Special landscape" and in Leeds' core strategy as "strategic Green Infrastructure". You are planning the development of 777 homes on Greenfield We object most strongly to this 'rape' of a Greenfield site.

2/

Site HQ2-43 is Green Belt, and in Leeds City College prospectus it is marked as a "Nature Reserve". Your core strategy limits development to "change of building only" - you plan 206 homes!

Please cap the housing target in line with the capacity of Broomfield Sites and provide the proper and necessary infrastructure before the building of houses.

Most importantly leave Green Belt alone

Yours faithfully
