Forward Planning and Implementation  
Leonards Buildings LEEDS LS2 8HD

When developers are given planning permission could it be compulsory that they build schools, shops and a few houses at the same time. This should mean the houses are being sold sooner and then build the rest of the houses later. People should be interested with shops etc. nearby.

Things must be taken seriously before building of houses is done

- 1) people already living in the area have to agree
- 2) there mustn't be a big increase in traffic when the houses have been built
- 3) schools must be able to take the children that are living in the new houses

This building should be done without having to resort to LEEDS GREEN BELT

I don't have a car but think my travel on a bus might get difficult as so many people seem to want to travel using their cars.

I am writing to the BUS COMPANY because their services may not be able to run to sensible time tables as a result of all this proposed building.
