

PDH00387

32 Barfield Ave
Yeadon
Leeds

LS19 7SH

Site HG2 - 10 Gill Lane.

I am objecting to the development of the above site. This site was in 1994 defended successfully as greenbelt.

If it had not been for local campaigners myself and most of my neighbours would not have been aware of this proposed development. Why is this so underhanded !!!!!!

Very secretive. Leeds Council have not communicated with us.

This site has mature and rare trees and used by cattle. Furthermore the road A65 cannot take more traffic. I believe the proposed purchaser has conducted a survey to his own advantage doing this survey in school holidays. More cars more carbon emissions. I thought the government was trying to cut down on emissions.

If you insist on putting up more houses Dentists and doctors and schools are already full to capacity. We need green land Please take

into consideration we like green fields
this is our heritage. Once built
on this green land will be gone.

It would have been courteous had
we had more information. Rawdon
library was sent incorrect leaflets.

I belong to a walking group and
we notice wild life etc. Walking
is exercise encouraged by NHealth.
We are an older group if you
take away green belt where are
we going to walk. Around houses.

If we need more houses please use
brown belt.

Local council should take note
of the people who live in these
areas. We moved from Devon
to live here forty years ago.
What is happening to England's
green and pleasant land.

I am objecting to
sites HG2 - 10
HG2 - 41
HG2 - 12

I would like to invite one of
the people in planning to spend
a couple of days with me and

Then you will see how long it
takes to travel to Leeds.
Traffic is already horrendous.
More houses more cars. More
carbon emissions.

Please leave our green fields
alone.

I do hope you will take
notice of our objections.
