Dear Sir

I have been a Horsforth resident for 38 years. I am deeply unhappy at the council's intention to try to snatch our green belt for housing.

The green parts of our village help to make it the attractive place it is, bringing visitors to spend money & thus help everyone.

Infrastructure (schools, doctors social services) are already under great pressure, making life difficult for many people. To lumber these departments with yet more is counting disaster. I live near the A65 & experience the misery of the

serious traffic congestion & pollution which is a threat to people's health.

I am concerned & therefore object to your proposals of building on green belt. Use the brown lands.

I object to fields

H92-41 south of Horsforth Roundabout to crematorium

H92-43 Horsforth college campus

H92-12 Woodlands Oxide Raedon

H93-2 H93-3-4 off A65 Raedon

The proposals to include these sites in the local plan is not consistent with national policy. To use "green belt" before brownfield is not justified & goes against Leeds Core Strategy.

Green belt is important for the well being & health of all. Yours Truly
