Dear Sirs. **PDH00715**

I am writing with regard to the above sites on the Leeds Site Allocation Plan.

These sites, as far as I can make out, are all GREEN BELT and GREEN SPACES. WHY? Do we not have any BROWN SITES which would improve people's surroundings rather than building on most of the green spaces Horsforth

2 of 4

Kan Rafi, there by sporting the encouragement of people who already live there:

has about fears, fears - also rapidly diminishing. of live in

beat end rise & like private builders

built a comparatively small number of houses at the end of beat end

General are fast several types of

fringe & ends for our area. & Katerer

will plan on this scale do if carried out. Data feeds Council really want

Keels & Bradford to merge?

be have had chaos on the 1765

is the Hasford Roundabout area for a

number of years and now change have

improved to some degree L.C.C. wants

To build houses round the roundabout

and on the A65 & that will set the pace

from back years and do nothing for the

holder of people living nearby.  
Why does Honsforth Farm to take  
1/3rd of the houses needed in North Leeds  
and will they be the houses that are  
needed?

As far as I can make out we will  
have Buildings for the centre of Leeds  
along the A65 (excluding Throckmold  
abbey grounds) through Honsforth, Raddens,  
Yeadon, Gwedydd using green Belt and  
green spaces most of the way - why?

I would add that, in fact I  
have ~~named~~ named these particular sites,  
I could include most of the ones named  
on your map.

I think these plans and the  
number of houses given are unworkable
