My objections to the
"LDF publication Draft Consultation"

I am mostly concerned about the proposals for
HG2-41, HG2-42, HG2-43, HG2-12,
HG3-2, HG3-3, and HG3-4,
the development of these sites in the
Local plan is NOT consistent with the
national policy.

I have lived in Horsforth all my life
and strongly object to the amount of housing to be
built on all our green field sites. I think there
is enough car pollution along A65 and roads
leading to it in and around Horsforth.

So to take a few remaining green sites for
more houses will only increase the pollution
more, and leave no green areas for people to use
for nature walks or cycling. Plus loss of habitat for
our wildlife. We need to keep house and car free areas for our
future health and well being

yours faithfully
