Dear Sir / Madam,

I am writing to express my deep concern at the proposed plans to develop areas HG2-12 and HG2-41 in the Harsforth / Rawdon area.

I cannot believe that ANYBODY would consider this an appropriate area for housing development of this magnitude.

I know the proposed sites well and have always felt that not only those people who live in the vicinity but also the residents of Central Leeds were very fortunate to have such an area of easily accessible natural beauty on their doorsteps. The lives of everybody who lives in the area will be

blighted if this goes ahead.

There are many brownfield sites that could be utilised without the need to destroy ancient woods / farmland and wildlife habitat.

Three / four years ago planning permission would never have been granted here for even one dwelling - how can it now be justified to give planning permission for this enormous number.

It is heartbreaking to feel that these green and open spaces may well be lost forever.

Please reconsider
