Dear Sirs,

8 Nov 15.

I am so concerned about the number of houses you say are needed. Why so many and who decided this.

Don't you think it would be better to get the infrastructure in place first?

What is needed is a tram or trolley bus for all of Leeds and even if it would cause havoc folks would love it when it was done. I don't believe I would be here to see it as I am 81 but I can imagine it.

I'm sure people would be happy you did it, not so building hundreds of houses.

In August the road right facing me was marked out with yellow paint lines. A lady sent me a letter to say there was ample parking down here I don't think so but anyway the holes as yet have still to be done, hope it happens before the bad weather comes.

Sorry about my writing I have a tremor in my hand and sometimes my writing goes astray.

Please please don't build on green belt, once it's gone, it will be spoilt forever.

Hope you make the right choices.

Kind Regards,
