Site Allocation Consultation note

Regarding sites HG2-12, HG-2-41, HG2-10, HG2-9, HG3-2,3,4

I am writing to object in the strongest terms to these green belt sites being considered for housing developments. There are many brownfield sites within the Leeds area that should be considered first. The proposals noted above would all seem to be in conflict with the councils own Core Strategy, and also contrary to the National Planning Policy Framework. These areas are a key local amenity for leisure and pleasure, areas for exercise, walking and wildlife that would be irreplaceable if lost. Given that the council also appears to be using outdated housing target figures as well in an attempt to justify these sites being included, their remaining as Green Belt status should be confirmed at the earliest possible opportunity.

Yours,

PDH00973
