Re: Number			

To whom it may concern

I am aged 73 years old.

I first came to Horsforth at the age of 21 years old when I set up in business with my husband in Town Street Horsforth subsequently to move to Featherbank Lane where it still is. My husband and I lived in Horsforth, Lee Lane West, till we moved to Rawdon in 1974. I have lived in the village in three separate places ever since.

We moved for a reason as there were wide open spaces plenty of places for the Children to play safely, no large volumes of Traffic. Two excellent schools Junior And Senior all within walking distance. There was sledging down the billing, skating on the Tarn. When you had passed your cycling proficiency test you could ride your bike on the road.

You have already decimated both villages with speed humps, I suppose for the extra Traffic generated now?

What I ask myself will it be like if all these houses with I notice, only 1 School, are Built, what about the traffic that will be generated then?

I am not sure that what you intend on our green belt is legal.

You are taking away any chance of my great grandchildren ever having the facilities my children and grandchildren have enjoyed.

This is not progress this going backwards to Dickensian times.

Yours faithfully

JEAN A LEEKS.
