6th November,2015.

Dear LCC,

Re: HG2-41, HG2-42, HG2-43, HG2-12, HG3-2

I object in the strongest terms to the development of these areas. It is in direct conflict with national policy on greenbelt development. Brownfield sites have not been used and LCC has no business even thinking of handing over these sites to make huge profits for developers. The Council should be forced to use ALL brownfield sites before any consideration is given to greenfield development. There would be no distinction between Rawdon and Horsforth if development took place and the historic nature of these areas would be lost for ever. The hospitals,doctors,dentists etc are at bursting point already and these developments would push these small historic towns over the edge.This matter has only come to my attention in a very roundabout way from a chance discussion otherwise I would not have known about it,I certainly have not heard about it from the Council.

Yours sincerely,

J.D.O'Malley-Gaunt
